

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 1 – CODING GOLF COMPETITION

Course Code:	CSA0305	Course Title:	Data Structures
CO Assessed:	CO4 – Articulation (BL3)	Assessment:	Assessment Tool 1 – Coding Golf Competition
Weightage:	35% of CIA	Total Marks:	100
CO4 Statement:	Apply hashing strategies for efficient data storage and sorting algorithms for arrangement of data.		
Student Name:	NIRUTHIKA SRI PRAKASH	Reg. No.:	192511294
Section / Batch:	2nd year/ CSE	Date:	

Code of Conduct

I niruthika sri prakash (192511294) (Name / Reg No)

certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: niruthikasriprakash

Instructions

- Log in to the assigned coding platform - Code chef (<https://www.codechef.com/skill-test/c-language-dsa>). Total: 100 Marks.
- You can only attempt this assessment once. Also, you will not be able to pause the assessment after starting.
- You are not allowed to switch tabs during the assessment, otherwise you will be blocked from the assessment.
- You will get a detailed report on your performance at the end of the assessment.

Section / Topic	Focus	Q Nos	Marks
Data structures	Code Chef	28	100
GRAND TOTAL:		100 Marks	

Rubrics for Calculation

Criteria	Weightage	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Problem Understanding	20	Accurately interprets all problem requirements and constraints before coding.	Understands most requirements with minor omissions.	Partially understands the problem; misses some constraints.	Misinterprets the problem or ignores key requirements.
Correctness of Solution	30	Program compiles successfully and passes all hidden and visible test cases.	Program passes most test cases with minor errors.	Program passes some test cases but has logical issues.	Program fails to compile or produces incorrect results.
Data Structure & Algorithm Selection	20	Selects the most appropriate data structure and algorithm with an optimized solution.	Chooses an appropriate solution with minor inefficiencies.	Uses a workable but less efficient approach.	Uses an inappropriate data structure or algorithm.
Code Quality & Documentation	20	Well-structured, modular, readable, and properly indented code with meaningful identifiers.	Readable code with minor formatting issues.	Basic coding style with inconsistent formatting.	Poorly organized code that is difficult to understand.
Time & Space Optimization	10	Demonstrates excellent optimization and correctly analyses time and space complexity.	Good optimization with minor inefficiencies.	Limited optimization and incomplete complexity analysis.	No optimization and incorrect or missing complexity analysis.

Not Attempted NIRUTHIKA SRI PRAKASH 01 Hrs : 57 Min < Prev 4/28

Statement

What is the output of the following C code?

```
#include <stdio.h>

int main(){
    int numbers[] = {1, 2, 3, 4, 5};
    printf("%d", numbers[5]);
    return 0;
}
```

Select the correct answer

☐ 0

☐ 5

☒ Garbage value

☐ Compilation error

Statement

What is the time complexity of this code?

```
s = 0
for i = 1 to n:
    s += i

for j = 1 to s:
    print(j)
```

Explain

Select the correct answer

☒ $O(n^2)$

☐ $O(n \cdot \log(n))$

☐ $O(n)$

☐ $O(n \cdot \sqrt{n})$

NIRUTHIKA SRI PRAKASH

01 Hrs : 58 Min

Statement

What is the time complexity of this code?

```
for i = 1 to (n / 10)
    for j = 1 to (2 * n)
        for k = 1 to k
            print((i * j) + 1)
```

Explain

Select the correct answer

☐ $O(n+mk)$

☐ $O(nm + k)$

☐ $O(n + m + k)$

☒ $O(nmk)$

Statement

What is the time complexity of this code?

```
i = 1
while i * i <= n:
    print(i)
    i += 1

i = 1
while i <= n:
    print(i)
    i *= 2
```

Explain

Select the correct answer

☐ $O(\sqrt{n})$

☒ $O(\sqrt{n} \cdot \log(n))$

☐ $O(n)$

☐ $O(\log(n))$
